

## **FOR IMMEDIATE RELEASE**

### **AirNet Goes International – Introducing International Next Flight Out Service**

**COLUMBUS**, Ohio – December 8, 2009 – AirNet Systems, Inc. (“AirNet”) announced today that it is now offering International Next Flight Out (NFO) service to popular international destinations.

AirNet’s international NFO service provides for next day and second day delivery service to 39 cities in 25 countries around the globe, with continued geographic expansion planned in the coming months. Flexible shipping options are available, including door-to-door or door-to-airport, customs clearance, and on-board couriers to provide enhanced security and persistent chain of custody.

“We’re very pleased to introduce our International NFO service.” Frank DiMaria, Senior Vice President of Sales & Marketing stated. “This service is something our customers have been requesting, and we are proud to introduce it after extensive research and development. It will allow our operations and customer service team to apply their significant skills to complex international shipments and build upon our already robust capability. Most notably the ability to mix our domestic airline with Commercial airline gateways to offer better transit times than other couriers, integrators, and freight forwarders will provide incredible value to our customers. It can effectively reduce international shipment transit times by two days.”

AirNet’s international NFO service is supported by its centralized Customer Support Center. International shipping experts are available 24/7/365 to assist customers with all aspects of the shipping process, including completing international shipping documents. Real time visibility, tracking and tracing, and up-to-the-minute status notification is available to customers online via AirNet’s state-of-the-art online web portal.

**About AirNet:**

AirNet Systems, Inc. focuses its resources on providing value-added, time-critical aviation services to a diverse set of customers in the most service-intensive, cost-effective manner possible. AirNet operates an integrated national transportation network providing expedited transportation services to commercial and whole sale customers that require time-critical small package delivery nationwide. AirNet's aircraft are strategically located throughout the United States. To find out more, visit [www.airnet.com](http://www.airnet.com).
