

FOR IMMEDIATE RELEASE

AirNet Flights Now Available through OAG's Cargo Flights Flight Look Up Service

COLUMBUS, Ohio – January 8, 2010 – AirNet Systems, Inc. (“AirNet”) announced today that it has partnered with OAG to integrate its flight schedules with OAG's Cargo Flights flight look up service.

Targeted to freight forwarders and anyone involved in shipment planning, Cargo Flights is a comprehensive, online flight schedule service that enables users to quickly and efficiently search for direct and connecting airfreight schedules from a web browser.

The system features multiple search options and detailed flight and aircraft information to pinpoint domestic, international, direct, and non-stop flights. It includes intelligent, user-friendly connection-building functionality to aid in easily building complex routings.

“OAG is recognized as the world's leading independent source of cargo flight scheduling information, and we are excited about integrating our flight schedules with their Cargo Flights online system.” Frank DiMaria, Senior Vice President of Sales & Marketing stated. “Cargo Flights provides yet another easy and convenient way for our customers to search for and obtain immediate, accurate information about AirNet's available flights. With our fleet of over 185 aircraft and over 400 nightly departures to US cities, this enables our customers to quickly choose the best AirNet flight option to insure their valuable, time critical small package shipments arrive safely, securely, and on time.”

AirNet customers can also view AirNet flight schedules online at www.airnet.com or by logging onto AirNet Connect®, AirNet's secure, web-based portal that provides online shipping, real time visibility to shipment information, and tracking and tracing capabilities. Customers can also call AirNet's 24/7/365 Customer Resource Center at 888-888-8463 for up-to-the-minute information about flight schedules and shipping options.

About AirNet:

AirNet Systems, Inc. focuses its resources on providing value-added, time-critical aviation services to a diverse set of customers in the most service-intensive, cost-effective manner possible. AirNet operates an integrated national transportation network providing expedited transportation services to commercial and whole sale customers that require time-critical small package delivery nationwide. AirNet's aircraft are strategically located throughout the United States. To find out more, visit www.airnet.com.

About OAG Cargo:

OAG Cargo provides an expansive portfolio of innovative products and services to the global air cargo community. Its air freight community portal OAGcargo.com includes tools for routing and shipment planning, dangerous goods regulations, a real-time air freight rates database, air and road schedule data, tracking and analysis solutions and multimedia cargo schedule products.
