

## When your aircraft is on the ground, AirNet flies into action.

As the third largest air cargo airline in the nation, AirNet understands the vital importance of expert, timely service and maintenance. The quality of our work is proven hundreds of times every day.

## Our Range of Services

AirNet is a FAR Part 145 Certified Repair Station (#BSYR610C) with Class Ratings that allow us to provide a full spectrum of maintenance and repairs.

- Maintenance
- Avionics
- Airframe
- FBO

## The Highest Level of Service

AirNet provides premium maintenance service on aircraft from every major manufacturer, with world-class customer service.

- ISO 9001 Compliant
- Department of Defense Approved
- On Time Performance - AirNet has built a reputation for completing work significantly faster than competitors. We get the job done when we say we will.
- When you have an AOG, we're there ASAP - If you have an Aircraft On Ground, AirNet has an industry best "On Demand Charter" capability that can be used to send a maintenance crew or AOG parts to your aircraft - anywhere, anytime - faster than any competitor. You are now able to benefit from AirNet's unique ability to move technicians on our airline to repair AOG aircraft. We also have a fully outfitted Mobile Maintenance Unit that we use to dispatch our aircraft/avionics technicians at a moment's notice. With our highly skilled technicians and exceptional service, we'll make it happen.

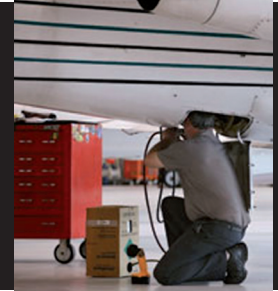

## Our expertise and experience are at your service.
